IS YOUR SMILE AGEING YOU?

Your smile is one of the first things people notice about you. If your teeth aren't as dazzling as they could be, a fast, one-stop whitening treatment promises to give great results.

When you think of anti-ageing treatments, your initial thoughts probably won't be about dental care – but they should be, because the ageing process also affects your teeth.

One of the first things people notice is your smile, and as we age teeth can become stained and yellow. Certain foods, especially those high in acid, will also cause discolouration of your teeth, as will drinking coffee, tea or red wine, eating citrus fruit and smoking. If you regularly chew the ice in your drinks, you're also on track to develop staining, as the ice creates in the enamel little cracks that fill with food debris.

A whitening treatment from Smile Bar can give you a fantastic smile and take years off your looks. Following on from the company's success in France, the USA and UK, Smile Bar clinics are now also located in Sydney at Weyfield Road Junction, Westfield Warringah Mall and Castle Towers shopping

malls and in the CBD as well as at Chalonere and Westfield Southland in Melbourne with more locations to come.

Smile Bar clinics offer a convenient, one-stop teeth-whitening service using a peroxide-free solution activated

Smile Bar offers a convenient, peroxide-free whitening service that gives you a brighter smile.

by LED light, which can leave your teeth up to nine shades whiter. Smile Bar also has a range of take-home products, including Daily White Fusion Cleansing and whitening microfoam and the Premium Home Whitening System, to keep teeth looking great after the first treatment.
